

The Center of Excellence  
in Tilapia & Catfish breeding

## Tilapia

We produce high quality  
Mono-sex and Mixed sex  
tilapia fingerlings

## Catfish

We produce high quality  
catfish fingerlings and  
broodstock

## Fish Feeds

We formulate fish feeds  
with crude protein of 25%  
and 27%

## About Us

Mwea Aquafish Farm is in Kirinyaga County, on the slopes of Mount Kenya at 1050m above sea level. The Fish Farm is 110km North East of Nairobi on the Nairobi-Embu road and 1.5km from Kimbimbi town.

This is a "Model Fish Farm" where Nile tilapia (*Oreochromis niloticus*) and African catfish (*Clarias gariepinus*) are raised in earthen, liner ponds and concrete/plastic tanks. It began in August 2009 on 3.5 hectares of agricultural land.

Farming fish here is practiced on 29 earthen/static ponds with well-laid liners, 8 hexagonal tanks and 15 circular tanks. Youth, college and university students are offered attachment to get on-hand training.

### Modern Hatchery

The hatchery has Nile tilapia and catfish breeding units

### Training Facility

We train on pond construction, management & record keeping among others

### Research

Excellent facility for research and quality seed production
